

CII RISK AND THREAT MODELING

Locked Jar

ABOUT US

Our company is dedicated to helping organizations improve their security processes and unlock the true value of their security programs. We understand that navigating the constantly changing landscape of security can be overwhelming and challenging, which is why we offer guidance and expertise to assist organizations in planning and executing their security projects.

Our approach is centered around the idea that small incremental changes can lead to significant progress. We work with our clients to identify areas for improvement and develop a plan to implement changes that are tailored to their specific needs. By focusing on making small but meaningful changes, we help organizations build a foundation for long-term success in today's rapidly evolving environment.

In addition, we recognize the importance of being "future ready" in the current business climate. We strive to help our clients stay ahead of the curve by providing expert guidance on the latest security controls and processes.

OUR GOAL

Our goal is to ensure that our clients are prepared for any potential threats and can protect their assets and data effectively. We understand the importance of having a robust and reliable security program, that's why we work closely with our clients to develop a comprehensive security plan that addresses current and future risks. Our team of experts is dedicated to staying up-to-date with the latest security trends and technologies, so we can provide our clients with the most current and effective solutions.

We strive to empower our clients with the knowledge and tools they need to build a strong and resilient security program. We work with organizations of all sizes and industries, and we tailor our services to meet the unique needs of each client. Our ultimate goal is to help our clients achieve peace of mind and a sense of security, knowing that they have the means to protect their assets, data, and reputation.

CHALLENGE

We were recently engaged by a leading company in the broadcasting space to conduct a comprehensive threat modeling, risk assessment, and review of all relevant materials, asset registers, and previous assessments. Our goal was to provide advisory services on critical information infrastructure to help the company identify and mitigate potential cyber threats.

EVALUATION

We began by evaluating the company's current practices and processes, using questionnaires and discovery workshops to identify any gaps in their work. Our team of experts carefully examined the company's IT infrastructure, including their networks, systems, and applications, to identify any vulnerabilities that could be exploited by cybercriminals.

ADVISORY

Services

1

Through the use of cutting-edge threat modeling techniques, we were able to identify potential attack vectors and prioritize the risks based on their likelihood and impact. We also reviewed the company's asset registers and previous assessments to ensure that all critical assets were properly protected.

2

Based on our findings, we provided the company with a detailed report outlining the identified risks and vulnerabilities, along with specific recommendations for mitigating them. Our team also provided guidance on best practices for incident response, recovery, and business continuity to help the company prepare for and respond to any potential cyber threats.

3

The company was extremely pleased with the results of our engagement, and they have since implemented many of our recommendations. They are now better equipped to protect their critical information infrastructure and respond effectively to potential cyber threats.
